

PreFlight®

PreFlight Adjuvant is an odor masking agent with some anti-foam capabilities. PreFlight masks harsh odors from herbicides, insecticides, and fungicides with a natural wintergreen smell. PreFlight may also reduce foam in spray tanks leading to faster fill times.

APPLICATION RATE:

Preventative: 1 ounce per 100 gallons of spray solution

Curative: Add PreFlight adjuvant as needed

INGREDIENTS:

Wintergreen Fragrance with emulsifiers and defoamer

PostFlight®

PostFlight Adjuvant is a tank cleaner and neutralizer which may have a dramatic impact on equipment's life and performance. Removing pesticide and fertilizer residues reduces metal corrosion and the deterioration of rubber seals, diaphragms, and hoses. PostFlight will also remove pigments, irons and other stains from spray equipment and other objects like sprinkler heads which may get pigment and colorants applied to them throughout the season.

APPLICATION RATE:

Large Tanks: 1 pint per 50 gallons of water

Small Tanks: 1 ounce per 3 gallons of water

Pigment Removal: PostFlight is ready to use. Apply liberally, wait 2-5 minutes, brush the surface and rinse.

INGREDIENTS:

100% Proprietary Blend of potassium hydroxide, Branched Alcohol Ethoxylate and Solvents

FEATURES & BENEFITS:

- A tank cleaner that neutralizes acidic-type chemicals
- Ready to Use pigment and stain remover

FPS™

FPS Adjuvant is designed for use in spray application equipment with foam marking capabilities.

APPLICATION RATE:

Fill foam tank half full with water and add 3 oz of FPS per 2 gallons of water

*Fill slowly to avoid premature foaming
