LIGHTING

Landscape lighting has the power to turn ordinary outdoor spaces into something magical. When done right, it accentuates architectural details, highlights garden features and increases home security.

At Heritage, we offer a full suite of outdoor lights and outdoor lighting accessories, including downlights, step lights, and transformers to keep it all ticking. Whether you're implementing path lights for styled safety, ramping up security with uplights, or using bistro lighting to give outside space life after dark, we have landscape lighting solutions to support any project.

Our offerings also include specialized holiday lighting for festive flair because we know every detail matters, every season.

This catalog is designed for contractors like you. In these pages we outline the various resources we can provide to ensure you are equipped with the tools necessary to transform any space. Want to learn more?

LANDSCAPE LIGHTING FIXTURES

Adding a well-designed lighting system is one of the easiest ways to enhance the look and feel of any landscape or outdoor living area. It also increases the usability of a home at night and overall security.

Because of this, landscape lighting has become a simple, creative way for contractors to add value to projects.

Whether you're looking to create a dramatic effect or a subtle landscape outline, our extensive range of products supports every kind of project.

LANDSCAPE LIGHTING FIXTURES

As homeowners look to make improvements to their homes, outdoor areas present nearly endless possibilities to create additional fun and practical spaces.

Let's explore some of the options available to help you transform your clients' blank canvas into an outdoor oasis.

Deck Posts

Deck posts can be illuminated with a variety of deck post lights (e.g., half-moon lights), available in cast aluminum and cast brass. Another option is to highlight deck railings using hardscape lights hidden under the lip of the railing.

Steps

Lighting up steps accentuates the beauty of this feature and provides a safe, visible pathway at night. A simple LED brick light can be integrated in the riser of each step, or another way is to insert a hardscape light under the cap of each step.

LANDSCAPE LIGHTING FIXTURES

Well Lights

Ideal for commercial accounts, in-ground lighting is less likely to get damaged from activity around the light, including lawn care and foot traffic. These are also ideal as their design prevents theft.

Up Lights & Accent Lights

Up lighting, or accent lighting, is the general description for several techniques that utilize surface-mounted or recessed fixtures that deliver light upward.

When uplighting trees, no project will be the same. This requires a creative eye to see how best to illuminate within the overall landscape design. The height, width, and texture of the tree dictate the kind of uplight you should choose. Broad trees like oaks may require wider beam angles, while tall pines may benefit from narrow beams.

LANDSCAPE LIGHTING FIXTURES

Wall Wash Lights

Wall Wash lights provide a gentle, evenly distributed illumination across a large area close to the structure, minimizing hot spots and maintaining consistent light density..

WHEN AND WHERE TO USE DIFFERENT COLORED LIGHTS

Different colored lights evoke different moods and can be used for specific purposes:

Warm White/Yellow: Comparable to candlelight, it gives a cozy, intimate ambiance, perfect for patios and relaxation areas.

Cool White: Resembling bright daylight, it's ideal for security lights or areas requiring clear visibility.

Colored Lights: These can give festive flair during holidays or special events. Always ensure they complement the overall design.

1 - 8 W 2700K/3000K Mini LED Bronze Aluminum Wall Wash Luminaire WAC51212730BZ	Alliance Lighting Flood Light, 20W G4 Bi-Pin 2700K LED Halogen FL50 Series AOLFL50	86 Degrees Vertical 3000K 600 Lumens Pure White Integrated LED Textured Architectural Bronze Aluminum Mini Wall Wash Fixture KIC16026AZT30

Lamps

Popular drop-in lamps used in outdoor landscape and architectural lighting are the MR-16 and T3. Both lamps feature a bi-pin design, but the base of each type is quite different. The MR-16 uses a GU base type, while T3 lamps use a G4 base type. Drop-in lamps are easy and tend to be more economical at cost per fixture. However, they lack the heat management and performance capabilities of integrated LED fixtures.

LANDSCAPE LIGHTING FIXTURES

Hardscape lighting can breathe new life into your next project. In addition to adding aesthetic value, it also provides additional safety, as people navigate these spaces at night.

Before you get started, there are two golden rules:

PLAN AHEAD

It's much easier to design and install hardscapes and lighting at the same time instead of hardscapes first and lighting later. Plan where the lights need to go and determine the wire routing up front.

CONSIDER FUTURE MAINTENANCE

When you're installing a hardscape fixture, if possible, leave yourself a little extra wire. If you should ever have to service the light, you will be able to unscrew it from the plate and pull it out. After servicing, you can feed the wire back into the wall.

Hardscape Lights

A 12V hardscape light can be integrated into a brick or stone wall during construction. Hardscape lights are usually installed just underneath the top cap of a sitting wall or retaining wall and are typically installed before the top cap is placed on the wall.

Key benefits of pitching landscape lighting to customers:

- Increase security and safety
- Increase home value
- Create living space that is usable night and day
- Enhance serenity of existing spaces

Underwater Lights

Illuminating water features with underwater lights is a popular and fun lighting technique. When placing underwater lights, be sure the light source is positioned so viewers don't see it.

HOLIDAY LIGHTING

Landscape contractors are finding that offering professional Christmas light installation is a great service for additional revenue.

As landscaping maintenance slows down after the fall season, landscape contractors need creative ways to increase revenue during the slow season. Christmas light installation for residential and commercial properties requires a similar level of manpower, tools and supplies. Making it an attractive option for many in the industry.

Before offering Christmas light installation as a service, there are several considerations to keep in mind.

Proper Storage

After buying Christmas lights and extension cords, you will need a place to store the Christmas lights during the rest of the year. Proper organization is key to ensuring smooth seasons to come.

Timing

Thanksgiving is a popular day to start turning on Christmas lights, which means you will want to start advertising your services in early fall. It's important to look through your crew's availability – and any necessary equipment – to make sure you have the resources available to meet this deadline.

Research Ahead

In some neighborhoods, there may be homeowner association restrictions dictating what day holiday lights can be turned on. Make sure your customers are aware of any restrictions in their area. There's also an opportunity to pitch the idea of a timer to control when the lights come on and turn off for an additional charge.

From accessories and tools to lights and decorative bows, we have what you need to get started with your next festive venture.

Smart Control Transformer

The Smart Control Transformer from Kichler Lighting offers the flexibility to design and schedule up to three separate lighting zones, so homeowners can customize and control the areas they want to illuminate based on their needs.

The Smart Control Transformer offers power monitoring and fault detection along with a manual mode setting for easy contractor set-up and dusk to dawn astronomical timer setting. It also allows for custom schedule creation by day and zone through the Kichler Connects™ app.

Designed with angled terminal blocks for easier wire connects and heavy-duty, stainless-steel construction, the Smart Control Transformer is ideal for outdoor environments.

WAC Colorscaping

Using state-of-the-art technology, illuminate your landscape with tunable white light from 2700K to 6500K and a nearly infinite color palette to create awe-inspiring, bold and dynamic custom lighting experiences to elevate your space.

FX Luxor Controller

As FX Luminaire's premium lighting control option, Luxor is the most advanced and flexible low-voltage landscape lighting transformer on the market. The controller incorporates zoning, dimming, and color control capabilities into a single control system using a simple two-wire path installation.

Key features include:

- **Zone control:** Turn individual or groups of fixtures on and off at desired times
- **Dimming control:** Adjust the intensities of individual or groups of fixtures from 0–100%

BLUETOOTH SYSTEM

Landscape lighting transformers are used to operate low-voltage lighting systems and can plug into a 120V standard GFCI outlet. But in a world where homeowners want more control, new advancements and features have become necessary.

Alliance BT System

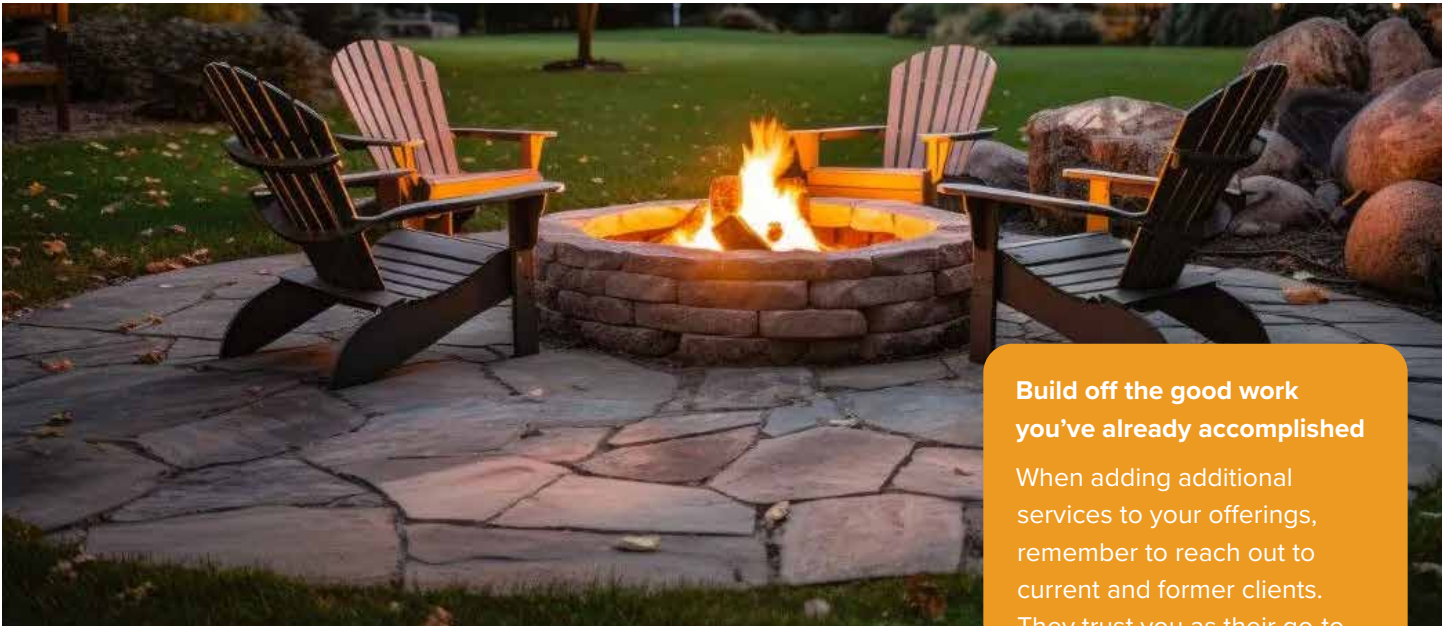

Systems like the Alliance BT System can help take your lighting design to the next level.

Alliance's BT system is easy to install and doesn't require a specific controller or transformer. It can be adapted to all sites, including those with existing low-voltage landscape lighting.

Key benefits include:

- **Dimming:** Control individual fixture intensity from 1% to 100% to dramatically change the appearance and make overall lighting more pleasing.
- **Color temperature control:** Tune individual fixture output infinitely from warm 2700K to silvery moonlight 4000K.
- **RGB color control:** Paint a landscape with rich, colorful light. Choose from up to 30,000 different custom colors, plus easy pre-set colors.
- **Scene/theme creation:** Create custom lighting schemes to suit specific times of day, activities, moods or events.

Build off the good work you've already accomplished
When adding additional services to your offerings, remember to reach out to current and former clients. They trust you as their go-to source and will appreciate knowing you offer these services.

At Heritage Landscape Supply, we're ready to help you get the most out of your landscape lighting system. We offer an assortment of lens accessories, mounting accessories, timers, photocells, cowls, wireless landscape lighting control, wireless motion sensors, and installation tools necessary to install a landscape lighting system.

Plus, our team of experts is available to help you create the oasis of your clients' dreams. Visit us at www.heritagelandscapesupplygroup.com to contact us today.

Additional resources

Landscape Lighting Techniques

Looking for a quick reference guide on various lighting techniques? This resource from Kichler Lighting outlines various ways you can light up a space. Also included are real project examples and educational videos.

Voltage Drop Calculator

FX Luminaire offers a convenient calculator that allows you to customize the different aspects of the lighting system such as wire gauge and run lengths. You'll find the voltage available at the last fixture as well as the total VA and alerts to any problems.

Path Light Spacing Calculator

Ensure you're illuminating where you need to and not where you don't with this handy tool from FX Luminaire.

MANUFACTURER REWARDS PROGRAMS

Kichler Lighting | LightPro Rewards Program

As a member of the Kichler LightPro Rewards program, you gain access to a full suite of business and marketing tools while earning points for qualified landscape lighting product purchases.

Redeem points from merchandise on everything from gift cards to an all-inclusive trip, receive a free layout from Kichler's layout and design services and explore their extensive training and educational opportunities.
