

BioCel Laminate and BioCel™ Cushion performance carpet backings and foam cushion are recommended for high and mid-range traffic environments including:

Synthetic Turf fields, playgrounds, putting greens, hitting mats, Residential carpet, Commercial carpet, Education, Retail, Healthcare, Assisted Living, Churches, Convention Centers, Hospitality, Main Street Commercial, Corporate, and numerous other applications.

BioCel incorporates a broad spectrum of antimicrobial: Pomofresh AWG is resistant to mold, mildew, fungus and bacteria.

BioCel™ carpet backings incorporate recovered material combined with post and pre consumer content. BioCel™ also utilizes recycled PET polyol from carpet and water bottle waste as well as pre-consumer recycled calcium carbonate from Imerys (ReMined).

REMIND IS:

- Third party certified 100% pre-consumer recycled material. Can improve LEED points qualification for 100% recycled content and local sourcing.
- NSF 140 compliant.
- Can reduce overall carbon footprint, and extend product cradle-gate life cycle.
- Consistent and high quality supply source with low heavy metal content.
- Available in various particle sizes to meet application needs.
- Produced from a trusted mineral supplier with application expertise.
- Specified BioCel™ technology from Universal Textile
- Technologies may contribute toward LEED® certification.
- From improving carpet and synthetic turf performance to benefiting the environment by incorporating recycled and recovered content, BioCel™ backing offers endless advantages and is a proven performer. BioCel™ Cushion is over 60% green with the combination of recycled and renewable content and is 100% recyclable at the end of useful life.
- Product is non-perforated
