

Gulfstream® Free Adjuvant

Gulfstream Free is a next generation spreader – buffering agent adjuvant that is free of nonyl phenols (NPEs). NPEs are highly toxic to aquatic life due to its ability to mimic estrogen, decrease male fertility, and limit survival of young aquatic life. Gulfstream Free is designed to improve the effectiveness of pesticides, fertilizers, and other plant protectants, by reducing surface tension of the droplets in order to increase plant coverage of the spray application.

APPLICATION RATE

RATE: 1 to 4 pints per 100 gallons

BACKPACK RATE: 0.25 oz per gallon

INGREDIENTS

99.25% Alcohol alkoxyate, methylated seed oil, and sodium salts of fatty acids

0.75% Constituents ineffective as a spray adjuvant

FEATURES & BENEFITS

- Nonionic surfactant free of NPEs
- Reduces surface tension so droplets spread out over a larger area leading to increased pesticide or fertilizer uptake.
- Contains proprietary technology to reduce the smell of certain pesticides and reduce the UV breakdown of most pesticides.
- Lowers spray solution pH to reduce alkaline hydrolysis and increase solubility of certain pesticides.
