

AirStick™ Adjuvant

AirStick™ adjuvant is a pinene resin-based product blended with paraffinic oil plus an emulsifier (surfactant). AirStick is a superior Sticker/Spreaders adjuvant with nonionic properties designed to improve the contact, wetting and adhesion of pesticides onto the plant surface. AirStick forms a soft film, which polymerizes. This film reduces the effects of rainfall erosion volatility and ultraviolet (UV) degradation on pesticide spray deposits. Under most conditions, apply sprays containing AirStick at least one hour, during daylight, before an anticipated rain. Sunlight, direct or indirect, is needed for the film to set.

APPLICATION RATE

RATE: 4 to 16 fluid ounces per 100 gallons

BACKPACK RATE: 0.25 oz per gallon

INGREDIENTS

100% Pinene (diterpene) polymer, Mineral oil, and Secondary alcohol ethoxylate

FEATURES & BENEFITS

- Improves - the efficiency of Herbicide/Insecticide/Fungicide sprays by increasing contact activity, penetration, and adhesion to plant surfaces.
- Forms a soft, elastic film - Holds the pesticide on the plant foliage and greatly reduces rainfall and irrigation erosion of the spray residue.
- The film will withstand about 1 inch of rain for seven to ten days.
