

Gravity[®] G Black Caviar[™]

Black Caviar is the new Heritage PPG humate additive. It is comprised of humic acids, Fulvic acid, and humin in the form of granular prilled humate. These compounds are long chain carbon molecules that have numerous hydrogen and oxygen exchange sites that can bond to nutrients and help make those nutrients more available to the plant. Humates are highly compressed, natural organic humus, formed through the biological breakdown of plant life over millions of years. These materials are mined and provide a rich source of highly concentrated naturally occurring humus.

FEATURES & BENEFITS

- Increased root respiration and root formation
- Improves Cation Exchange Capacity of the soil and facilitates nutrient absorption
- Stimulate growth of beneficial soil organisms
- Improved aeration of soil and water retention in heavy and compact soils
- Prevent water and nutrient loss from leaching, volatilization and erosion
- Improve soil function and fertility
- Increase inhibitor reduced Nitrogen loss
