

Gravity[®] L Tap-In[®] Technology

Our Tap-In Technology offer a unique solution for plant nutrition. These small molecule plant-based compounds are easily and rapidly absorbed by the plant, making them highly effective as both foliar and plant tissue treatments. The organic and amino acids used in our product act as carrier molecules, aiding in important metabolic processes and stress management within the plant. Suitable for various crops including turf, ornamentals, nursery, and greenhouse. This water-soluble fertilizer is non-toxic to plants while providing essential nutrients. Our formulation has been meticulously designed for optimal absorption and compatibility with other fertilizers or chemicals. Trust our product to prevent or correct deficiencies during the crucial early stages of plant development due to its readily available complexing properties.

TAP-IN PRODUCTS

- Gravity L Iron
- Gravity L Manganese
- Gravity L Magnesium
- Gravity L Calcium

FEATURES & BENEFITS

- Applied through foliar, root drench, broadcast or fertigated methods
- Low application rates and rapid nutrient absorption/uptake
- Non-phytotoxic
- Non-staining technology
