

Water Management Mount Blocks

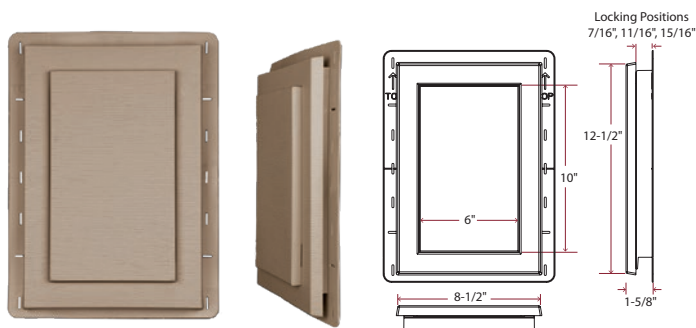

- Our Water Management Blocks are designed with channels to divert water to the front face of siding, offering premier protection against damaging moisture.
- Includes a Trim Ring that hides your cuts and requires no caulking. It has multiple locking positions allowing it to accommodate a variety of siding thicknesses.
- Water Management Blocks have a heavier woodgrain than our standard mount blocks. They are designed to work exceptionally well with hard board sidings such as natural wood, fiber cement, and engineered wood.
- Comes in over 40 standard colors and over 200 non-standard colors, matching many popular brands of fiber cement and engineered wood. No need to paint on site.
